

LOWE ALPINE

Fall Line 35

\$150

Weight: 3LB. 9OZ. • Volume: 35 liters • Web: lowealpine-usa.com

The Fall Line 35 is another front-loader, with enough volume for a fully-equipped day trip. Lowe's slick Torso Fit system quickly and easily adjusts the distance between shoulder straps and hip belt, for a custom fit to a variety of body shapes. A front shovel pocket and tool organizer holds a large blade easily; the hip belt has a handy snack pocket; there's a small zippered keys pocket inside; and a fleece-lined goggle pocket is accessible without opening the pack. Ski carry is of the diagonal variety, with rubberized wear areas for durability, and snowboards fit securely in a vertical configuration. The Fall Line is the strongest overall pack of the review, built with all of the features skiers need, and none they don't.
